

Tire Industry – Additive Monitoring

Customer

- Michelin Italia SPA, Ronchi (Italy)

Bulk Material

- Talcum powder

Task

- Monitor additive dosed into a tire cutter
- Detect clogging and disturbances
- Replace a competitor's sensor
- Installation place: Additive feeding line (DN32) into cutter

Solution

- Bulk solids flow switch **DYNAguard K** with relay output

Customer Benefit

- Immediate automatic disturbance detection
- Avoid plant downtime
- Contactless and wear-free measurement (wear protection inlet)
- Durable and reasonable solution

Installed DYNAguard K
